

The Board of Trustees embraces energy conservation and believes it to be the district's responsibility to ensure every reasonable effort is made to conserve energy and natural resources while exercising sound financial management.

The board recognizes the importance of adopting an energy conservation policy. The board also affirms the implementation of this policy will be the joint responsibility of the board, district administration, faculty, staff, students, and support personnel. Success is based on cooperation among all groups.

To ensure the overall success of the behavior-based energy conservation program, the following areas will be emphasized:

- A. A district facilities office will be accountable for energy conservation, including conducting energy audits and providing timely feedback.
- B. All personnel at each campus/site are expected to make a positive contribution to maximize energy conservation and produce real energy savings.
- C. Accurate records of energy consumption and cost will be maintained by the district facilities office to provide verifiable performance results on the goals and progress of the energy conservation program.

Further, to promote a safe, healthy learning environment and to complement the energy conservation program, the district shall review and adhere to the preventive maintenance and monitoring plan for its facilities and systems, including heating, ventilation and air conditioning, building envelope, and moisture management.
