6                    Mr. Wezniak is one of the greatest teachers here at the CLC. Although not for me, math can be hard for many people. He tries to help every single person to understand.

7                    :)

8                    Erica Duran is supper teacher

11                   not at this time.

12                   Mr. Wezniak is a great teacher who has really helped me understand math better.

15                   Mr. Wesniak is a great teacher and like the way he teaches.

16                   I have never had a math teacher I have liked and understood before this class

17                   I suggest to resolve Geometry exercises or examples in line with time of period.

18                   I really enjoyed bring taught by Mr. Wezniak.

19                   Mr. Wezniak is a passionate educator and a lover of math. It is obvious watching him teach that math is something he really enjoys, and that enjoyment is contagious. He has helped me to enjoy math like never before, and I am now considering pursuing math on the main campus upon completing his class. This school is lucky to have him.

20                   Good math class.

21                   Mr. Wezniak is an amazing teacher!

31	I like this class it help me to improve
32	Even if I do not show it in class, Mr. Steve Wezniak is a really great teacher. I wish I had the option to prove that with my attendance but unfortunately finding the balance in the chaos is hard, but I feel that he does care for his students academically as long as they put in the work and don't give in. The way he teaches is a bit hard, but in a good way, he pushes you because he sees the potential in his students. If you could let him know this that would be great. I know this is anonymous but he should know his hard work and dedication to his students is noticed.
33	have different ways you answer the problem and to check the answer after

12	it is impossible to learn all information in 5 Minutes per lessons, and that is not egsageratting. We are expected to get it the same, and not giving anytime for the ones who are a little slower you are just handing out information you are not teaching this class is a waste of time I get more information on how to do it by vedio on the Internet. Math should be a hybrid class because we all don't learn as fast or the same.. This is not a satisfactory class you are just clocking in and taking home a paycheck what happened to really helping someone archive there dreams..Mira costa is lukewarm in mathematics department. It is a waste of my time when I can get more help from other sources.. There is a constant disruption in class from other students and he does not know how to control the class.. I don't hold Mr Elhg responsible, but the school...
