Upon completion of the Psychology for Transfer Program, students will be able to develop a study on a psychological topic, which includes a literature review, hypothesis, research design, consideration of ethical issues, data analysis, and summarizing research findings. The schedule is conducive for students to pursue internships through MiraCosta College's Career Center in their area of interest to gain real life experience. An Educational Plan is recommended. This program is based on Plan C: IGETC which is transferable to CSU & UC.
